DK90 BT30-16L

Beijing BOD Technology Co., Ltd

FEATURES

1. The housing is made of aircraft-grade aluminum. After precision machining and aging treatment, it has the features of long service life, outstanding rigidity and accuracy. Allows a minimum pass of $\Phi 100\text{mm}$
2. The main drive shaft is made of special alloy material. It can achieve high stability during the transmission after processed by strict heat treatment and grinding finish.
3. The imported gears and bearings with good quality ensure the high torque and low noise in transmission.
4. The way of input and output are flexible and diverse. Not limited to connecting with BT shanks and ER collets, our angle heads can meet all kinds of precision machining equipment for milling, drilling, tapping and grinding processes etc.

Optional Shanks

HAIWANJINGGONG

◆ Model	DK90-BT30-16L
◆ Driving Shank	BT30
◆ More Shanks	Applicable
◆ Max.Speed	8000RPM
◆ Output Rotation	CW-CW
◆ Ratio Of Transmission	1:1
◆ Passing Diameter	D100
◆ Clamping Range	D1-D10
◆ Tapping	M4-M8
◆ Torque	18Nm
◆ Weight	1.851 kg
◆ Inventory	In Stock
◆ Customization	Support

PARAMETERS

DK90 BT30-ER11

Beijing BOD Technology Co., Ltd

FEATURES

1. The housing is made of aircraft-grade aluminum. After precision machining and aging treatment, it has the features of long service life, outstanding rigidity and accuracy. Allows a minimum pass of $\Phi 75\text{mm}$
2. The main drive shaft is made of special alloy material. It can achieve high stability during the transmission after processed by strict heat treatment and grinding finish.
3. The imported gears and bearings with good quality ensure the high torque and low noise in transmission.
4. The way of input and output are flexible and diverse. Not limited to connecting with BT shanks and ER collets, our angle heads can meet all kinds of precision machining equipment for milling, drilling, tapping and grinding processes etc.

Optional Shanks

HAIWANJINGGONG

◆ Model	DK90-BT30-ER11
◆ Driving Shank	BT30
◆ More Shanks	Applicable
◆ Max.Speed	8000RPM
◆ Output Rotation	CW-CW
◆ Ratio Of Transmission	1:1
◆ Passing Diameter	D75
◆ Clamping Range	D1-D7
◆ Tapping	M4-M6
◆ Torque	10.8Nm
◆ Weight	1.661
◆ Inventory	In Stock
◆ Customization	Support

PARAMETERS

DK90 BT30-ER16

Beijing BOD Technology Co., Ltd

FEATURES

1. The housing is made of QT500-7. After precision machining and aging treatment, it has the features of long service life, outstanding rigidity and accuracy. Allows a minimum pass of $\phi 100$
2. The main drive shaft is made of special alloy material. It can achieve high stability during the transmission after processed by strict heat treatment and grinding finish.
3. The imported gears and bearings with good quality ensure the high torque and low noise in transmission.
4. The way of input and output are flexible and diverse. Not limited to connecting with BT shanks and ER collets, our angle heads can meet all kinds of precision machining equipment for milling, drilling, tapping and grinding processes etc.

Optional Shanks

◆ Model	DK90-BT30-ER16
◆ Driving Shank	BT30
◆ More Shanks	Applicable
◆ Max.Speed	8000RPM
◆ Output Rotation	CW-CW
◆ Ratio Of Transmission	1:1
◆ Passing Diameter	D100
◆ Clamping Range	D1-D10

PARAMETERS

DK90 BT40-ER11-90

Beijing BOD Technology Co., Ltd

FEATURES

1. The housing is made of QT500-7. After precision machining and aging treatment, it has the features of long service life, outstanding rigidity and accuracy. Allows a minimum pass of $\Phi 75$
2. The main drive shaft is made of special alloy material. It can achieve high stability during the transmission after processed by strict heat treatment and grinding finish.
3. The imported gears and bearings with good quality ensure the high torque and low noise in transmission.
4. The way of input and output are flexible and diverse. Not limited to connecting with BT shanks and ER collets, our angle heads can meet all kinds of precision machining equipment for milling, drilling, tapping and grinding processes etc.

DK90 BT50-ER16-66

Beijing BOD Technology Co., Ltd

FEATURES

1. The housing is made of QT500-7. After precision machining and aging treatment, it has the features of long service life, outstanding rigidity and accuracy. Allows a minimum pass of $\Phi 100$
2. The main drive shaft is made of special alloy material. It can achieve high stability during the transmission after processed by strict heat treatment and grinding finish.
3. The imported gears and bearings with good quality ensure the high torque and low noise in transmission.
4. The way of input and output are flexible and diverse. Not limited to connecting with BT shanks and ER collets, our angle heads can meet all kinds of precision machining equipment for milling, drilling, tapping and grinding processes etc.

Optional Shanks

◆ Model	DK90-BT50-ER16-66
◆ Driving Shank	BT50
◆ More Shanks	Applicable
◆ Max.Speed	8000RPM
◆ Output Rotation	CW-CW
◆ Ratio Of Transmission	1:1
◆ Passing Diameter	D100
◆ Clamping Range	D1-D10

FEATURES

1. The housing is made of 40Cr. After precision machining and aging treatment, it has the features of long service life, outstanding rigidity and accuracy. Allows a minimum pass of $\phi 51$
2. The main drive shaft is made of special alloy material. It can achieve high stability during the transmission after processed by strict heat treatment and grinding finish.
3. The imported gears and bearings with good quality ensure the high torque and low noise in transmission.
4. The way of input and output are flexible and diverse. Not limited to connecting with BT shanks and ER collets, our angle heads can meet all kinds of precision machining equipment for milling, drilling, tapping and grinding processes etc.

Optional Shanks

HAIWANJINGGONG	◆ Model	DK90-BT50-PER16	PARAMETERS
	◆ Driving Shank	BT50	
	◆ More Shanks	Applicable	
	◆ Max.Speed	6000 RPM	
	◆ Output Rotation	CW-CW	
	◆ Ratio Of Transmission	1:1	
	◆ Passing Diameter	D51	
	◆ Clamping Range	D1-D10	
	◆ Tapping	Thread Milling	
	◆ Torque	18. Nm	
	◆ Weight	10.074 kg	
	◆ Inventory	In Stock	
	◆ Customization	Support	

专注加工定制 - 角度头 侧铣头

FOCUS ON MACHINING CUSTOMIZATION
- ANGLE HEAD, SIDE MILLING HEAD

Beijing BOD Technology Co., Ltd

Beijing BOD Technology Co., Ltd

Beijing BOD Technology Co.,Ltd

Beijing BOD was established in 2011 in Beijing. With more than ten years of experience we supply professional solutions to the factories and dealers of CNC machine tools and testing equipment all over the world. Our main products are Lathe workholding and accessories such as spring collets, rubber-flex collets, ER collets, guide bushings and extension rods etc. Compressed air treatment products, Briquette machine, Tank cleaning machine. We also supply custom machining services for small precision work-pieces which are widely used in aerospace, automotive, machinery, medical industry and other areas.

We offer our services around machining and the machining environment. Our products help end users improve production efficiency, workers' working scenarios and labor intensity, simplify the production and make the workshop environment energy-saving and environmental protection, so that the return on investment of end users and their investors can be quickly realized.
