WHO ARE WE

Ecosteel Source is a professional supplier of steel materials, offering Zinc-Aluminum-Magnesium (Z-A-M) coated steel, Galvalume (GL), pre-painted steel coils, and steel construction product made from that like Floor Decks, Steel Truss Floor Deck, Sandwich Panels (Hand-made & Machine-made), C/Z/U purlins, steel Studs, Tracks & Furring Channels, and Steel Accessories like Steel Strapping Seal.

With advanced processing equipment and strict quality control, we deliver durable, eco-friendly, and customized solutions for construction, industrial facilities, infrastructure, and cleanroom systems.

OUR STORY

Rooted in Nature. Committed to the Future.

Ecosteel Source was founded in Sichuan, a region known not only for its emerging industrial base, but also as the native home of the giant panda – a global symbol of ecological harmony. Inspired by this unique environment, we are deeply aware of the responsibility to balance industrial progress with environmental sustainability.

In today's fast-evolving steel industry, we believe that strength and sustainability should go hand in hand. Drawing from the panda's symbolism of balance and resilience, Ecosteel is committed to delivering steel solutions that combine durability with environmental responsibility.

Born in Sichuan – a place of strength and serenity – we carry the spirit of the giant panda into everything we build.

OUR STORY

Inspired by the panda. Built for a greener world.

As both a materials supplier and a finished product manufacturer, we serve a wide range of industries — from industrial construction and cold chain logistics, to coastal projects and cleanroom environments. Whether it's floor decking, roofing panels, or structural components, we aim to reduce maintenance, extend service life, and minimize the carbon footprint of every building.

Our mission is to bring harmony between industry and ecology.

With every coil, panel, or beam we deliver, we take a step toward a greener construction future.

When you choose Ecosteel, you are not only choosing reliable steel products —

you are choosing a future where performance and sustainability work together.

PRODUCT OVERVIEW

- Steel Building Materials:** Floor Deck System; Roofing & Wall Panels; Metal Studs & Purlins
- Coils & Sheets:** Galvanized Steel (GI); Galvalume Steel (GL); Zinc-Aluminum-Magnesium (Z-A-M) coated steel, Pre-painted color coated steel (PPGI, PPGL)
- Steel Accessories:** Steel Strapping Seal

PRODUCT SERIES

FROM **PREMIUM** TO **VALUE** — TAILORED FOR EVERY PROJECT

 **ES Prime Series**
Premium · Innovative · Exceptional

 **ES Standard Series: Balanced · Versatile · Durable**

 **ES Value Series: Affordable · Practical · Reliable**

HOW TO CHOOSE?

At Ecosteel Source, every series delivers the same reliable foundation—what sets them apart is the **material grade** and **performance level**.

- **Unified Standards:** All series follow the same specifications in size, thickness, and structure.
- **Tailored Performance:** Differences lie in the raw materials and durability enhancements.
- **Worry-Free Choice:** Select the series that matches your budget and project goals with full compatibility assurance.

PRODUCT SERIES

FROM **PREMIUM** TO **VALUE** — TAILORED FOR EVERY PROJECT

ES Prime - Flagship Performance

- Top-tier quality
- Advanced coatings
- Extended lifespan
- Premium applications

Typical materials: High-grade ZAM steel (Zinc-Aluminum-Magnesium), premium Galvalume (like AZ120, AZ150), High zinc coat Galvanized steel (GI) (from 150 to 900g/m²), fluorocarbon (PVDF) coated steel etc.

ES Standard - Balanced Reliability

- Solid performance
- Good corrosion resistance
- Cost-performance balance
- Versatile use

Typical materials: Galvanized steel (GI) (Zinc 60g-120g/m²), Galvalume (GL)(less than AZ120), basic ZAM steel, HDP&SMP Pre-painted Steel etc.

ES Value - Smart Affordability

- Economical solution
- Essential quality
- Simplified specs
- Budget-focused use

Typical materials: Basic Galvanized steel (GI) (Zinc 30g-60g/m²), economical PE Pre-painted Steel etc.

GALVANIZED STEEL (GI)

Galvanized steel (usually called GI steel material) is a metal product with a uniform layer of zinc coating on its surface, which is produced through either hot-dip galvanizing or electro-galvanizing processes.

The zinc coating effectively isolates the steel substrate from air, moisture, and other corrosive media, forming a dense protective film that provides excellent corrosion resistance and extended service life in real usage. Combining the high strength and workability of steel, this product displays outstanding weather resistance and cost-effectiveness.

Galvanized steel now has become an essential material in many industries, especially in modern construction, home appliances, transportation, and industrial manufacturing.

Specifications

Thickness: 0.11mm-6.0mm, depends on orders

Width: 22mm-1500mm, depends on orders

Grades: DX51D+Z, SGCC, SGD350, etc. (depends on orders)

Surfaces: Spangle Galvanized and Non-Spangle Galvanized

Non-spangle Galvanized

Spangle Galvanized

GALVANIZED STEEL (GI) COILS

Spangle Galvanized Coils

Non-spangle Galvanized Coils

Embossed Galvanized Steel Coils

GALVANIZED STEEL (GI) SHEETS

Spangle Galvanized Sheets

Non-spangle Galvanized Sheets

Embossed Galvanized Steel Sheets

GALVANIZED STEEL (GI) SERVICES

We offer **a range of processing services** tailored to customer requirements.

These include **slitting large coils into smaller coils, cutting into narrow strips or flattening into sheets**, and providing further fabrication into finished products such as C/Z/U purlins, light steel furring channel keels, and other customized items in our product catalogue.

Quality Assurance

Ecosteel Source uses premium base steel and strict production control to ensure the strong adhesion and consistent coating thickness of products.

We offer galvanized steel coils in various specifications, including regular zinc coating (40–275 g/m²) and customized high-zinc products (like 600–900g/m², depends on demand). All products comply with ISO, ASTM, and EN international standards, which guaranteeing reliable performance across diverse climate conditions in real usage.

EASY STEPS TO ORDER

Start Your Order Today

 Inquiry →  Quotation →  Sample → 
Contract & Payments →  Production →  Packing & Balance →  Shipment & Documents →  After-sales

-  **Inquiry** : Provide product specifications (material, size, coating, color, quantity, application).
-  **Quotation** : Get formal quotation with price, lead time, payment, and other details.
-  **Sample & Drawing** : Confirm samples or drawings for customized colors/patterns.
-  **Contract & Payments** : Sign PI/contract and pay deposit to schedule production; Special customized products require full payment in advance.
-  **Production & QC** : Manufacturing with strict quality control, third-party inspection available.
-  **Packing & Balance** : Packed to international standards, and settle balance payment.
-  **Shipment & Documents** : shipment arranged with documents, receive full set of shipping documents.
-  **After-sales** : Technical support, long-term supply and project services.

WHY CHOOSE US

Uncompromising Quality

Strict quality control and testing ensure durability, corrosion resistance, and consistency.

Tailored Solutions

Customized sizes, coatings, and finishes to meet unique project needs.

Competitive Value

Advanced manufacturing and efficient supply chain deliver cost-effective solutions.

Sustainable Commitment

Eco-friendly production and long life cycles support greener construction.

Global Support

Reliable logistics and professional support ensure timely delivery worldwide.
