

Applications

- To provide a safe and stable power for door bell and power-consuming device.
TF6 door bell transformer is used as a safe and ideal power source device for door bell and other power-consuming devices under the circuit of AC
- 50Hz, rated working voltage 250V with output volume 8VA.
- In compliance with IEC / EN61558-1 EN61558-2-8
- Maximum connecting ability of 6mm², wiring torque 2Nm, Protection class: IP20w

TF Transformer Order Code	
Ue(~)	Order Code
A: 4V, 8V, 12V	TF-A
B: 8V, 12V, 24V	TF-B
C: 4V, 12V, 24V	TF-C
